SUMMARY

Data Analyst with hands-on experience in genomic data processing, including FASTQ/VCF handling, quality control, and large-scale data management in cancer research projects. Skilled in Python, Linux, and bioinformatics tools, with a strong interest in molecular epidemiology and population genomics. Capable of working with high-throughput datasets and supporting research-driven analysis.

WORK EXPERIENCE

Assistant Data Manager, **Kharghar, Mumbai**
Tata Memorial **Jan 2025 - Present**

- Process genomic data including FASTQ and VCF files for cancer research studies
- Perform quality control using FastQC and manage sequencing workflows
- Handle large-scale datasets using Linux-based tools (DRAGEN, Putty, WinSCP)
- Support variant data processing, cleaning, and basic analysis
- Collaborate with research teams for epidemiological and genomic data analysis
- Use Advanced Excel for data reporting and validation

Data Engineer **Oct 2023 – Nov 2024**
Pinnacle Infotech, Navi Mumbai

- Worked on database management and data handling tasks, ensuring data accuracy and consistency
- Developed and maintained structured datasets for analysis and reporting
- Assisted in data processing workflows and improved data organization efficiency
- Collaborated with team members to support data-driven decision-making
- Demonstrated strong problem-solving, ownership, and responsibility in assigned tasks

EDUCATION

Bachelor of Science in Informational Technology **July 2020 - May 2023**
Mumbai University, Maharashtra
CGPI – 8.88

Higher Secondary School **July 2019 - Feb 2020**
S S High School & Junior College
Percentage: 62%

PROJECT DETAILS

Genomic Data Processing Pipeline.

- Worked with FASTQ and VCF files for sequencing data analysis
 - Performed QC and data validation using FastQC
 - Assisted in variant-level data processing and organization
-

CRUD Web Application (Spring Boot)

- Built full-stack application using Spring Boot, Thymeleaf, and MySQL
- Implemented authentication and role-based access

Automated Fire Avoidance System via SMS

- Innovative fire safety solution using Arduino microcontroller.
 - Provides a reliable and cost-effective alternative to commercial systems.
 - Detects gas levels with 98% accuracy and displays readings on an LCD.
 - Sends SMS alerts to authorities and property owners for faster response.
-

Technical Skills

- FASTQ & VCF Data Processing
- Quality Control (FastQC)
- GWAS / PheWAS (Basic Understanding)
- Data Cleaning & Preprocessing
- PCA (Population Stratification – Basic)

Skills & Tools

Bioinformatics Tools

- PLINK
- ANNOVAR
- IGV
- DRAGEN

Programming & Systems

- Python
- Linux (grep, awk, bash)

Other Tools

- R Studio
 - Advanced Excel
 - WinSCP, Putty
 - Git & GitHub
 - VS Code
-
